

archmodels vol. 285

Archmodels vol. 285 is a collection of 85 models combined in 12 sets of urban infrastructure models based on the technology of ecological renewable energy sources. You will find models such as electric vehicles, photovoltaic benches, charging stations and solar inverters with solar panels. Additionally, the sets have been enriched with elements of urban greenery to fit into the modern, ecological urban environment. The models are consistent in material terms and can be combined with each other. The materials were prepared in the PBR metallic/roughness system and are based on individual maps. Happy rendering!
